G. W. LOCKINGTON Front Street

If you have been very ill, and are not recovering as fast as you expected, Ayer's Sarsaparilla will make your blood pure and will give you strength and energy.

Mrs. M. McShane, Hobart, sends this letter, with her photograph:
"After recovering from a long attack of typhoid fever I suffered from a poor appetite and great depression, and was so weak I could hardly walk. Having seen

Ayer's Sarsaparilla

advertised as such a good blood purifier and general tonic, I thought I would try it. I did so, and soon my old strength came back, my appetite returned, and before I had finished the second bottle I could do all my work just as well as before."

There are many imitation Sarsaparillas. Be sure you get "AYER'S."

Prepared by Dr. J. C. Ayer & Co., Lowell, Mass., U. S. A.
AYER'S PILLS, the best family laxative.

Fan Motors, swivel frame 18
Sewing Machine Motor 20

Power for operating them \$1 a month
Installation charged extra.

Estimates furnished on all classes of Electrical Work and Contracts taken to install apparatus complete.

ISLAND FORESTRATION.

Practical Aid Offered by the Government.

Circular No. 1 of the Division of Forestry is issued. It contains valuable information concerning the value of timber, and offers assistance to those desirous of engaging in the growing of trees.

INTRODUCTION.

Among the imports into Hawaii for the fiscal year ending June 30, 1905, wood products ranked seventh in value, the total for timber, lumber, door and window fittings, etc., and for furniture, being \$528,110. In a price list recently issued by one of the leading lumber dealers in Honolulu ordinary rough lumber, Northwest (Red or Douglas Fir) and Redwood, is quoted at from \$30 to \$35 per M., while Redwood fence posts are listed at 24 cents each. No stronger commentary is needed on the desirability of a local supply.

THE OFFER.

To assist in meeting the demand, the Division of Forestry stands ready, so far as its limited appropriation will permit, to render practical and personal assistance to individuals or corporations desiring to establish forest plantations, wood lots or windbreaks, or to do other forest work.

This assistance is given in two ways:

First—By keeping constantly on hand fresh seed of the more important native and introduced trees and also a limited number of nursery grown seedlings of the kinds most in demand; the seed and plants being sold at prices just covering the cost of collection or growing.

Second—By advice and suggestion as to the kinds of trees best adapted for the purpose, locality and situation of the person desiring to plant, and the methods to be pursued to secure the best results in the planting.

Tree planting on a large scale in

this country is necessarily a somewhat expensive operation and when undertaken should be done advisedly and in accordance with a systematic plan. The purpose of the Division of Forestry in offering to cooperate with the individual planter is to stimulate interest in tree planting, and by the introduction of good methods to secure the best results in the work done.

There are many areas of waste land in the Territory where forest trees could, with advantage, be planted. On almost every sugar plantation are unproductive corners and strips of land, where it is not advisable to plant cane, which could well be devoted to trees. The proper kinds being set out would in time yield good returns for bridge timbers, fence posts, railroad ties or fuel, besides in the meantime improving the appearance of the country-side. But tree planting is not restricted to the corporation or to the larger owner alone. To the homesteader it is equally, perhaps even more important, to have a wood lot from which he can obtain supplies of wood or fuel. And further, it should not be forgotten that the sale value of a place is increased by the presence of trees about the house, the whole protected if need be by a windbreak on the exposed side.

The Division of Forestry stands ready to give advice as to the kinds of trees best adapted for particular needs and as to the methods which should be followed to insure success, in all classes of forest-tree planting. It will also undertake for a time to give advice on roadside and street tree planting, although this is not strictly within the province of forest work.

The services of the agent of the Division of Forestry are without cost to the applicant, but his expenses for traveling from Honolulu to the locality visited and return, and his subsistence, must be borne by the applicant. When several persons on a single island are visited on one trip, the cost of the

trip will be divided among them.

HOW TO MAKE APPLICATION.

Applications for the assistance offered in this circular must be made in writing to the Superintendent of Forestry, P. O. Box 331, Honolulu. They should specify the exact location, the acreage to be planted, the object for which the planting is done, and the time when it is desired to begin planting.

Correspondence in regard to the purchase of seed and plants should be addressed to Mr. David Haighs, Forest Nurseryman, P. O. Box 331, Honolulu.

RALPH S. HOSMER,
Superintendent of Forestry.

Tide of Tourist Travel.

Honolulu, March 16.—"This Asiatic tourist is just beginning." J. A. Kennedy, president of the Inter-Island Steam Navigation Co., made the foregoing remark with emphasis yesterday. As he had returned from San Francisco the previous day, no doubt the dictum quoted reflects a Coast opinion. "Yes, it is just beginning," Mr. Kennedy went on to say. Tourist travel to the Orient is going to reach enormous proportions.

"Tourists from Europe are coming this way in prodigious numbers. Europeans, having seen the rest of the world, want to see Asia. And Honolulu will get a great many stopovers if things are properly worked.

"The amount of money tourists leave in a place is something of which folks have but little knowledge. It is immense. What is directly expended in hotels and stores does not show completely. The bank exchanges must be known to convey an adequate impression of truth. An enormous amount of money changes hands through the banks in every Coast city frequented by tourists."

Mr. Kennedy imparted some exact statistical information regarding the bank deposits by tourists in one particular city, but had reasons for not giving permission

to publish the statement. Perhaps one reason for confidential treatment of figures was that they would make the ears of local promotionists tingle unto imperilment of their hearing. Certainly there would be a loud tingling, for the amount for thirty days was not in hundreds of thousands. It was in millions.—Advertiser.

Tahitian Tidal Wave and Hurricane.

Tahiti and all the islands of the Society group were swept by a tremendous tidal wave on the night of February 7th, and the tidal wave was followed by one of the most disastrous hurricanes ever known in the South Seas.

More than one hundred islands were devastated, the principal island, Tahiti, probably suffering less in proportion to its importance than any of the others, and about 28,000 persons were affected by the great disaster.

There has been no such other tragedy in the South Seas during modern times, and it is improbable that the historic devastation, similar in nature, of about 125 years ago was of such serious consequence.

Favorably Considered.

Washington, March 15.—The House Committee on Territories has practically agreed to report favorably Kuhio's bill to grant Hawaii money for public improvements. The bill allows the use of 75 per cent of the Federal revenue of the Territory for a period of twenty years for such improvements. The bill may be amended regarding length of time.

Chamberlain's Cough Remedy Acts on Nature's Plan.

The most successful medicines are those that aid nature. Chamberlain's Cough Remedy acts on this plan. Take it when you have a cold and it will allay the cough, relieve the lungs, aid expectoration, open the secretions and aid nature in restoring the system to a healthy condition. Sold by Hilo Drug Co.
